**5.2 Assessment of the cosmetic's impact on tolerance at the site of application (repeated application)**

On the basis of medical examinations and interviews collected from subjects we found that the tested product **GLANMOOR DETOK ZEOLITE TRUMBLE CLEANSING WATER** was very well tolerated at the site of product application. In 24 out of 25 subjects, who finished the study, during the regular application, in the interview there was no negative symptoms and feelings that might indicate an intolerance to any component of the product, such as irritation, burning sensation, redness or itching. One subject [20. SIK SO] reported burning sensation after each application. The product did not cause dryness at the site of application in any subjects.

Contraindications for use of the product are: acute inflammation of the place of application, requiring pharmacological treatment, and allergy recognized or hypersensitivity to any of its ingredients.

**The results obtained in the test allow to conclude, that the product used as intended is very well tolerated by the people, in whom there is not a contraindication to its use.**

**5.3 Confirmation of the effect claimed for the cosmetic product**

*Regulation of the European Parliament and of the Council (EC) No. 1223/2009 of 30 November 2009 on cosmetic products.*

Based on the results of use test – we concluded that properties of product **GLANMOOR DETOK ZEOLITE TRUMBLE CLEANSING WATER** declared by the Client were assessed as follows:

• The product revitalizes the skin.	96%	positive responses
• The product leaves skin clean and clear.	100%	positive responses
• The product has moisturizing effect.	92%	positive responses
• The product provides flawless complexion.	96%	positive responses
• The product helps to purify the pores gently.	96%	positive responses
• The product eliminates the layer of pollution particles accumulated daily.	100%	positive responses
• The product helps to balance skin oiliness.	100%	positive responses

**Moreover:**

• Suitable fragrance.	80%	positive responses
• Suitable fragrance intensity.	92%	positive responses
• Suitable consistency.	100%	positive responses
• Easy spreadability.	100%	positive responses
• Pleasant product application (comfort of use).	96%	positive responses
• Overall assessment of the product.	80%	positive responses
• Comparing with other similar products used in the past, the tested product was assessed as better.	48%	positive responses
• Intention of buying the product.	72%	positive responses

Answers on all questions are presented in the Appendix **7.1**.
